

VISION AND VALUES

Overall:

We are committed to working with students with complex needs in an individualised way, achieving outcomes that will enhance their future independence.

We:

- Use specialised approaches that enable students to learn effectively;
- Liaise with parents/carers and other agencies, to ensure students are as well supported as possible;
- Provide a safe environment that allows students to express their personality and develop their self-esteem;
- Engage enthusiastically with the local community and others, for the benefit of students; and
- Continually try to learn from each and others, to improve what we do.

We want our students to:

- Feel good about themselves;
- Do their best;
- Respect others; and
- Be extended in body, spirit and mind.
